210W Under-Desk Infrared Heater

UT603403GC210

Localised radiant warmth for a seated workspace.

210W	IP20	110°C	3 years
Rated heating power	Dry indoor use	Max. surface temperature	RADI8 warranty

Technical specification

Overall dimensions	615 × 416 × 17 mm (including sensor and knob)
Net weight	1.9 kg
Heating element	Graphene carbon, far infrared
Construction	Infrared ceramic-coated front, aluminium frame, clad-steel rear
Electrical supply	220–240V AC / 50Hz, earthed UK socket
Plug and cable	UK 13A three-pin plug, 1.9 m cable
Rotary control	OFF / 30% / 60% / 100% of operating time
Overheat protection	Manual-reset thermal cut-out
Supplied mounting parts	3 brackets, 6 M4 × 12 mm screws and 3 washers

Under-desk mounting only

Use the supplied brackets to mount the heater beneath a suitable wooden desktop at least **15 mm thick**. Fit with the heating face pointing down.

Leave at least **200 mm clear below the heating face** and **100 mm clear at each side**. Keep legs, clothing, cables and surrounding objects outside these clearances.

Controls and safe use

The rotary settings control how long the element is energised. The red light stays on at levels 1–3, including during normal heating pauses. Follow the supplied manual for installation, use and resetting the thermal cut-out. Do not use an external timer or automatically switched supply.
